Hello,

I am writing to show overall support for redistricting draft map NDC 203, with a few slight modifications.

Of the three proposed redistricting maps, NDC 203 best represents District 3 and the establish criteria of being:

- Geographically Contiguous
- Communities of interest, cities, & census designated places kept together as much as possible; &
- Use easily identifiable, existing natural or artificial boundaries (rivers, creeks, parks, streets, highways, rail tracks, etc.).

I recommend modifications to NDC 203, District 3, by eliminating the areas north of Arden-Arcade & Carmichael that are north of I-80, identified on the map as North Highlands and McClellan Park. North Highlands and McClellan Park should be split between District 1 & 4 in order to follow the artificial boundary created by I-80.

Sincerely,

Lance Salisbury

Citizen – District 3
