Attached is a pdf with suggested mapping options for Rancho Murieta. It is concerning that a tentative conclusion was published in your Board of Supervisors presentation. That is included again in the November 6 workshop documents. You have not received any comments from Rancho Murieta that support this conclusion. All of the maps prepared that support this decision were prepared by parties that do not live in Rancho Murieta.

I stated in the meeting that MAP NDC-201 is most supportive of the economic, transportation and social synergies of our community.
