Good morning,

I'm following up from my public comment during this past Saturday's redistricting virtual public workshop. I spoke about the need to recognize the Asian Pacific Islander (API) community in the South Sacramento (Valley Hi/North Laguna), Florin, and Vineyard area as a community of interest that should be kept together with the large API community in Elk Grove in District 5 to the best extent possible. There was another speaker from the API community who also spoke to that issue and it's my understanding that she and a coalition of other API leaders have sent in a letter to that effect. I'd also like to share the attached two maps taken from the county's [NDC mapping tool](#) (which is a very helpful tool!) that shows a high concentration of "Percent CVAP Asian" and "Percent Speak Asian Languages at Home" in those areas, providing important data points that give weight to that feedback about where the API community is located.

I respectfully ask that NDC's powerpoint presentation to the Board include the community feedback on the API community as a community of interest in those areas and please include the attached two maps, similar to how the map submitted by an LGBTQ organization was included in the prior presentation. Thank you!

Regards,

Andrés Ramos
