BACKGROUND

The U.S. Constitution requires that everyone residing in the United States be counted every decade. The resulting Census data is used for geographically defining state and local legislative districts. This process is called "redistricting."

The Census Bureau originally planned to deliver 2020 Census data to states beginning in February 2021 and would finish by March 31, 2021. However, due to COVID-19, all Census operations were significantly impacted, causing major delays in states receiving the necessary data. The Census Bureau estimates that it will deliver 2020 Census data to all states and the public by September 30, 2021, a nearly six-month delay.

Once California receives 2020 Census data, the statewide database will move into the 30-day process of building the State's redistricting database, which

will population adjust the dataset as required by Elections Code Section 21003 as well as incorporate historical election results to assist the State and local jurisdictions with Voting Rights Act compliance. Elections Code Section 21003 requires that the State adjust census data to reallocate the prisoner population by last known residential address at which the prisoner was last domiciled. This population-adjusted data is the dataset the County is required to use to draw its maps. This data will likely not be available until the end of October resulting in the County having approximately six (6) weeks to complete its redistricting work.

At this time, County staff and counsel advise that the Board must adopt its final maps no later than December 15, 2021. Staff recommends that if the Board adopts final district maps by ordinance, the first reading should occur on November 17, 2021, and the second reading on December 7, 2021.

While the County waits to receive the adjusted census data, staff will work on public outreach and engagement. The redistricting website includes dates for upcoming hearings and workshops, templates for community members to complete and mapping tools with instructions. Members of the public are encouraged to provide public comment and input on communities of interest, mapping priorities and draft maps. Additional resources are available at <https://www.saccounty.net/redistricting> by phone at (916) 874-5411.
